Linkedin: <https://www.linkedin.com/in/david-ose-iyileh-a16655255/>

Objective: Analytically driven data scientist with hands-on experience in predictive modeling, visualization, and SaaS development across healthcare, agriculture, and cybersecurity domains. Skilled in Python, R, SQL, Power BI, Tableau, and cloud tools. Passionate about transforming complex biological and clinical data into actionable insights. Seeking opportunities in computational biology, biomedical informatics, or data science to support precision health research and translational decision-making.

Technical Skills

- **Programming & Data Analytics:** Python, SQL (Intermediate), R (Intermediate)
- **Data Visualization:** Power BI, Tableau, Figma (Basic), Excel
- **Data Processing & SaaS Development:** ETL, Data Cleaning, Data Modeling
- **Cloud & Data Tools:** Azure, AWS, Google Cloud, Git, Power Automate
- **Soft Skills:** Data Storytelling, Problem-Solving, Stakeholder Communication, Agile Methodologies

RESEARCH EXPERIENCE

NSURS Capstone Research/Data Science Thesis – Warren Wilson College

September 2024 – Present

- Developing predictive models for early detection of metabolic diseases in cattle (Grass Tetany, Milk Fever).
- Analyzing calcium, magnesium, and potassium levels using AES-OES; correlating with behavioral indicators (chute score, exit velocity, hair whorl positioning).
- Built Bayesian logistic regression models and ROC curves in R to identify at-risk animals.
- Refining model interpretability and generalizability for veterinary and human health applications.
- Scheduled for formal presentation in December 2025.

Sustainable Research Assistant – Cape Eleuthera Institute, The Bahamas

August 2022 – August 2023

- Conducted statistical and molecular data analysis using R and Excel to assess coral reef stress responses.
- Designed predictive models to evaluate environmental stressors and biological impacts.
- Presented findings on cross-species vulnerability and ecosystem restoration strategies.

Community-Engaged Research – Cherokee Nation, North Carolina

June 2024 – June 2025

- Led health workshops and listening sessions to align traditional health knowledge with biomarker data.
- Explored culturally responsive analytics for chronic disease detection and health equity.

PROFESSIONAL EXPERIENCE

Data Science Intern, *Springer Capital, Illinois, Chicago*

May 2025 – August 2025

- Built dashboards for financial and healthcare data using Power BI & Tableau
- Automated workflows with Python/SQL, reducing retrieval time
- Supported SaaS tool development for workforce optimization

IT Security & Data Analyst Intern, *Appen, Sunnyvale California*

June 2024 – August 2024

- Developed security dashboards and validation protocols
- Improved UX and compliance through AI-powered analytics

Cybersecurity & Data Analytics Intern, *ExcelMind Cyber, Dallas, Texas*

January 2024 – May 2024

- Built ML-driven threat detection models and IAM solutions
- Automated incident response pipelines for faster mitigation

EDUCATION

B.S in Data Science and Sust. Agriculture. | *Warren Wilson College / Swannanoa, NC*

May 2026 - Expected.

KEY PROJECTS & RESEARCH

- **Data-Driven Physician Workforce Analytics:** Built a Python-based data modeling framework for analyzing healthcare workforce trends.
- **Ransomware Analysis & Mitigation:** Researched machine learning-driven anomaly detection for healthcare cybersecurity applications.

ORGANIZATIONS / Leadership & Involvement

Student Liaison, ENGAGE Program
Warren Wilson College

September 2023 – Present

- Integrating community feedback into dashboard development and data communication strategies.

CERTIFICATIONS

Power Automate, Machine Learning Fundamentals
